

Index.html

- The home page is designed like a chat conversation that welcomes visitors
- It briefly introduces who I am with short messages and images
- The layout alternates messages from left and right to feel like a natural chat
- At the end it guides the user to check the menu for more information about me

About.html

About Me

Today

Name: Yoonkyeong Han (Yoon)
Nationality: South Korean
Year: 2018
Age: 20

I came to Austria for my exchange program because I wanted to experience different cultures, study, and travel around Europe.

It's an even more amazing place than I imagined!

My hobby is reading. I especially enjoy novels and essays. I don't read as often as I'd like to, but I try to make time for it whenever I can.

One line from a book that has stayed with me is: "Even when life felt hard and overwhelming, the small choices I made to keep living were always great."

The things I like are ...

I like cute animals, eating delicious food while watching my favorite YouTube videos, listening to music while walking, and trying new things.

The most recent challenge I tried was paragliding. It felt amazing to be up in the sky, looking down at the whole city. It was so refreshing and exciting!

Someday, I'd like to be brave enough to try skydiving too.

[Home](#) [About Me](#) [Gallery](#) [CV](#) [Contact](#)

- This page is where I introduce myself in more detail
- It includes my photo, my basic information, and a few things that describe who I am
- I talk about my hobbies, what I like to do, and some of my recent experiences

Gallery.html

My Gallery

Today

I had a chance to travel around Europe during my summer vacation, and here are some photos I'd like to share.

This photo was taken in Paris.

This photo was taken in London.

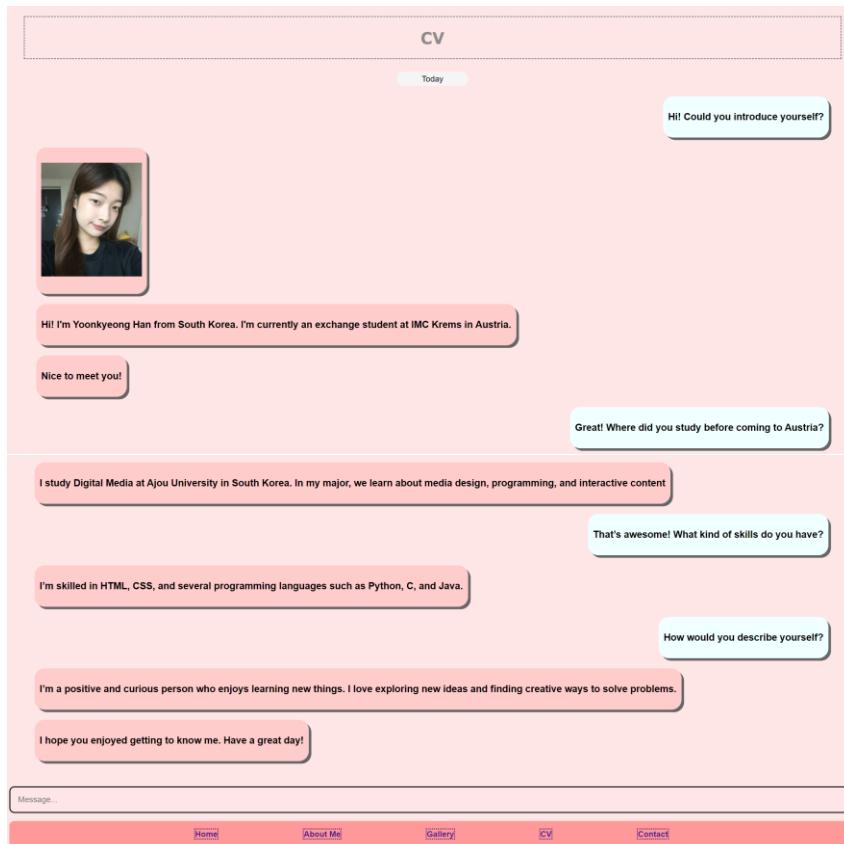

And this photo was taken in Switzerland.

[Home](#) [About Me](#) [Gallery](#) [CV](#) [Contact](#)

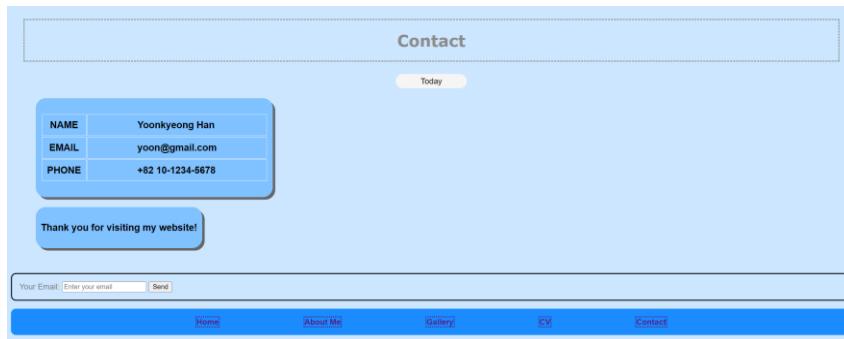

- This page shows some of the photos I took during my summer trip around Europe
- I arranged the pictures in small groups so that several can be seen at once like sharing photos in a chat
- Each group has a short message that explains where the photos were taken

CV.html

- The CV page is made as a conversation where questions are asked and answered in chat bubbles
- It shows my background, major, and programming skills
- The format makes it feel more interactive and less formal than a typical CV

Contact.html

- This page includes my contact information such as my name, email, and phone number.
- I added a simple message area at the bottom to make it look like a real chat window.

- The "Send" text on the right side is just for design, to make it feel like an actual message bar
